## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 30, 2008 has been entered.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 7 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Schubert et al (US Patent # 5,741,105). Schubert et al discloses a method of processing a product (tab 1) comprising the steps of separating a raw material (1) for the product from a work piece (12) comprising the raw material (1) by forming a slit (see FIG below) in the work piece (12) while leaving a micro joint (13) connection connecting the raw material (1) and the work piece (12), wherein the slit is defined by an outer periphery of the raw material (1) and an inner periphery of the work piece (12) and wherein the micro joint connection is positioned within the slit, positioning a portion (14) of the raw material on a lower metal mold and bending the portion (14) of the raw material (1) downward using an upper metal mold and the lower metal mold, while maintaining the micro joint (13) connection between the raw material (1) and the work

piece (12) [See col. 3 lines 22-25 and col. 5 lines 6-28], and dropping the product by separating the micro joint (13) connection between the raw material (1) and the work piece (12) [See col. 5 lines 29-36 and FIGS 2A-2C].

In reference to claim 8, the portion (14) of the raw material (1) is bent downward greater than 90 degrees [See col. 5 lines 21-26].

#### ***Allowable Subject Matter***

The prior art of records neither discloses nor teaches the claimed limitations directed to the upper metal mold and the lower metal mold and bending and severing within a die hole of a die main body. Therefore claims 18-20 are allowed and claims 9-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Debra Wolfe whose telephone number is (571) 272-1904. The examiner can normally be reached Monday - Thursday 7am - 4:30pm with alternating Friday 7am - 3:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Derris Banks can be reached at (571) 272-4419. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
